Hi Chris,

You may recall that several weeks ago, I had requested your assistance in placing utility boxes at the site along the western side of Sepulveda Boulevard, between 77th Street and and the Howard Hughes exit, where we were having new sidewalks laid down. The guys did a great job, and the project is 99.9% completed. The final component is the application of the "Aprons" at the base of the three street lights which are now posted along that thoroughfare.

Accordingly, can you assign a crew to place the aprons at these three locations?

Given this request even more thought, with this being the final component of this effort, if you can let me know when the crew will be going to the site, I'd like to meet them there and take a few photos of them doing the work. With the weather being what is forecasted, let's not look at anything until well into next week.

Regards,

Mark
